EDUCATION

Mapua University | Makati

Expected Sept 2026

B.S. in Computer Science, Data Science Specialization

Relevant Courses: Data Science, Software Engineering, Data Structures and Algorithms

TECHNICAL SKILLS

Languages: C++, Java, JavaScript, Python

Technologies: FastAPI, Git, Node.js, React.js, Typescript, Streamlit

Tools: Google Cloud Platform, Jira, Jupyter, VS Code, Excel, OBS Studio, Supabase, Firebase, Tableau

EXPERIENCE

Google Developer Groups on Campus | Mapua University

Aug 2025 - Present

Chief Technology Officer

- Led a **12-member student developer team**, ensuring delivery of technical projects
- Designed and developed a custom photo booth system for the organization using **FastAPI**, **React**, and **GCP**.

Google Developer Groups on Campus | Mapua University

Feb 2025 - Aug 2025

Technical Committee

- Managed the technical operations and audio visual system of organizational events.
- Used **OBS Studio** for scene switching, screen sharing, and media playback during events.

Kumon Math | Valenzuela

Oct 2023 - Apr 2024

Student Assistant

- Reviewed and checked students' math homework and classwork.
- Assisted students in understanding concepts in **algebra**, **geometry**, and **introductory calculus**.

PROJECTS

Imagen Photo booth | FastAPI, React, Google Cloud Platform

Dec 2025

- Designed and built an AI-powered photo booth kiosk that generates custom backgrounds based on user prompts.
- Deployed during organizational events, contributing to event and organization revenue generation.
- Developed frontend and backend systems using **React** and **FastAPI**.

Formula 1 Podium Predictor | Python, Streamlit

Dec 2024

- Conducted data analysis on **27,000+** Formula 1 race records spanning 76 years to identify performance trends and key variables
- Developed a predictive model to estimate whether a driver would finish on the podium based on starting position and historical win counts.
- Achieved an accuracy of **91%** using decision tree classifier.
- Developed interactive dashboard and deployed using **Streamlit**

QuizCraft | Typescript, FastAPI, Google Cloud Platform

Dec 2025

- Led a 3-member development team in developing an AI-powered web application that allows users to make interactive practice questions from their notes.
- Built backend APIs using **FastAPI** for quiz generation and note processing.
- Developed frontend features using **TypeScript** for user interaction and quiz functionality.
- Integrated LLM services through **Google Cloud Platform** and implemented secure credential management.
